

Sr No	Date	Tip
1	11/02/2025	To reduce your electricity consumption, set the temperature of your air conditioner between 24°C and 26°C.
2	12/02/2025	To reduce your electricity consumption, switch off all unused appliances and switch off lights in unoccupied rooms.
3	13/02/2025	To reduce your electricity consumption, turn off all appliances which are in standby mode, including computers and TVs.
4	14/02/2025	To reduce your electricity consumption, close all doors and windows of the air-conditioned room.
5	15/02/2025	To reduce your electricity consumption, clean the filter of the indoor unit of your air conditioner once every two months.
6	16/02/2025	To avoid excessive electricity consumption, choose the capacity of your air conditioner according to the size of your room.
7	17/02/2025	To reduce your electricity consumption, have your air conditioner serviced yearly by a qualified technician.
8	18/02/2025	To reduce peak electricity consumption, run dishwashers, washing machines and cloth dryers during early mornings.
9	19/02/2025	To reduce your electricity consumption, avoid using your washing machine with the hot water setting.
10	20/02/2025	To reduce your electricity consumption, do not place your refrigerator in direct sunlight or near an oven.
11	21/02/2025	To reduce your electricity consumption, allow your food to cool down prior to placing it in the refrigerating appliance.
12	22/02/2025	To reduce your electricity consumption, do not overfill your refrigerator.
13	23/02/2025	To reduce your electricity consumption, purchase an inverter-type air conditioner
14	24/02/2025	Direct exposure to the sun of the outdoor unit should be avoided. To reduce your electricity consumption, a sunshade for the outdoor unit is desirable to improve its efficiency.
15	25/02/2025	To reduce your electricity consumption, use a sensor or a timer on your outdoor lighting system to ensure that your outdoor lights are on only when required.
16	26/02/2025	To reduce your electricity consumption, use solar powered yard lighting.
17	27/02/2025	To reduce your electricity consumption, maximize daylight usage where applicable.
18	28/02/2025	To reduce your electricity consumption, allow enough space for continuous air flow around your refrigerator to cool down its compressor and condenser coil.
19	01/03/2025	To reduce your electricity consumption, set the temperature of the fresh food compartment of your refrigerator to 4°C to 5°C
20	02/03/2025	To reduce your electricity consumption, when purchasing a household appliance check the energy label and choose the most efficient one.
21	03/03/2025	To reduce your electricity consumption, turn off your computer, printer and screen when you leave the office afterwork.
22	04/03/2025	To reduce your electricity consumption, use a steam iron instead of a dry one.
23	05/03/2025	To reduce your electricity / gas consumption, allow frozen foods to defrost at room temperature before cooking.
24	06/03/2025	To reduce electricity consumption, avoid using lifts to move up or down one or two floors.

25	07/03/2025	As far as possible install ceiling fans instead of air conditioners. Ceiling fans use four times less electricity than air conditioners and require very little maintenance for effective cooling.
